

## **Sewing Lab:**

After cutting the fabric according to pattern, the cut parts are sorted and the sewed in different machinery. In this lab programmable logic circuit based sewing machine and analog sewing machine are available. This lab is enriched with Bartacking machine, Overlock machine, Chain stitch machine, Kansai machine, Blind stitch machine etc. where all are used to complete a garment sewing. Some are used for functional purpose and some are for decorative purpose

The key machinery of this lab include:

1. Overlock machine: Sew seams, trim fabric edges, and overcast fabric, create decorative stitches, insert zippers, finish edges with a professional-looking finish.
2. Chain stitch machine: a multi-purpose machine for attaching elastic, attaching waistband, sewing the front of shirts, attaching line tapes, smocking and shirring etc., which are ideal for underwear, sportswear, lady's clothes, interior decorated goods.
3. Blind stitch machine: A blind stitch machine will do the blind hem stitch, which is found on dresses, skirts, and trouser legs. The blind hemmer makes its stitch by moving the needle from side to side rather than up and down like a traditional sewing machine.
4. Bartacking machine: Bar tacking sewing machine is used to secure pocket corners, belt loops, the open end of a button hole, zipper flies.

Overlock machine

chain stitch machine

Blind stitch machine

Bartaking machine

There are some more machinery are used in this lab that include.....
